DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The Examiner is maintaining the rejection for claims 49 and 51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. 49. (New) The computer-readable storage medium according to Claim 37, wherein the defined time limit is about 6.0 to 8.1 microseconds.

Claims 37 and 43 recites the limitation "wherein the receiving at a transmission node and transmitting of said data packets to a receiving node occurs within a defined time limit". There is insufficient antecedent basis for this limitation in the claim.

Examiner unsure of the claimed language, specifically "the receiving at a transmission node...a receiving node," is this the same transmission node and receiving node mention on lines 5 and 16, respectfully of claim 37? Explanation/Correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 37, 38, 40-43, 46, and 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admission of Prior Art (AAPA) via Ahern et al. (US 6,388,658) and Thornton et al., (US 6,385,666) and Thornton et al. (US 6,633,934).
